NATURE'S PARTNERS

MATCHING ACTIVITY!

In *Nature's Partners*, explore eleven unique cross-species partnerships between mammals, reptiles, insects, birds and plants that increase the chances of survival for all species involved.

After reading the book, test your memory! Which animals are part of the same cross-species team? Draw a line between the animals who rely on each other for survival in the wild.

Colombian lesser black tarantula

Ants

Plains zebra

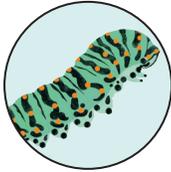

Flowers

Saharan spiny-tailed lizard

Red-billed oxpecker

Caterpillars

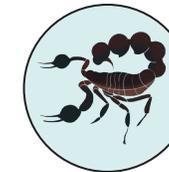

Ostrich

Bees and hummingbirds

Dotted humming frog

Hippopotamus

Arabian fat-tailed scorpion
